OPEN SOURCE PROJECTS

• **Project A: [Adopt Your Pet]**   *October 2024*
Tools: [Fully Responsive, Tailwind CSS]   [○]
  ◦ Filtering pets by category: This feature lets people look through pets based on different groups. The newest pets are dynamically pulled from an API and added to each group.

  ◦ Detailed Information About Pets: Each pet card has a "Details" button that gives a window with much information about the pet. The "Details" button opens the window, which gives users the information they need to make an adoption choice.

  ◦ Design That Responds: The website works on all screen sizes because it is fully adaptable. Tailwind CSS is used for flexibility, and Flexbox and grid systems are used for layouts that can change based on the user.

• **Project B: [Open Arms Donation]**   *September 2024*
Tools: [JavaScript (ES6+), Tailwind CSS, HTML, Google Fonts.]   [○]
  ◦ Responsive Design: Optimized for mobile, tablet, and desktop using Tailwind CSS and DaisyUI, ensuring seamless access on any device. updates.

  ◦ Donation Cards: Each card represents a specific cause with details about the cause and a donation input field.

  ◦ Real-time Balance Updates: Automatically updates donation totals and balances as users input their donations.

• **Project C: [Dream Cricket Team]**   *November 2024*
Tools: [JavaScript (ES6+), Tailwind CSS, DaisyUI, HTML,React.js, JSON.]   [○]
  ◦ Player Selection: Users can select players from a list while adhering to selection constraints (maximum of 6 players, unique selections, and price validation). updates.

  ◦ Team Management: The selected players are displayed with options to remove them, allowing users to manage their team roster effectively.

  ◦ Claim coin: To choose player you need to claim free coins first, that give you the ability to choose player for your team. typography
